Brief report /Description of the event

An industry visit was organized to Lumax Industries Ltd. At Chakan, Pune to provide practical exposure to students and to bridge the gap between theoretical knowledge and real-world industrial practices. The visit helped students understand the functioning of an organization, its management structure, production processes, and the detailing that goes in the manufacturing of automotive lighting products where Lumax is the market leader in the Indian market.

The industry visit began with a Video & PPT presentation in their training room Gurukul. The video enlightened the students about the Lumax Group and its presence in the world and their strategic partnerships. The PPT focused on the plant that we were visiting – the products being manufactured – the clients being served such as Mahindra, Tata Motors & Volkswagen and the safety and other protocols being implemented at the plant.

After this briefing, the students accompanied by the teachers were taken on the plant visit where the assembly line, surface treatment area and the molding section was shown to the students. The students were divided in two groups for the purpose of the plant visit.

The plant visit was followed by the address of the Plant Head Mr. Patnaik. Mr. Patnaik encouraged the students to consider the manufacturing sector for employment and wished the students great success in their studies and would be careers. This was followed by the felicitation of Mr. Patnaik by Dr. Mangalgouri Patil and Dr. Praful Sarangdhar. Plant Head Mr. Bhate was felicitated by Dr. Sarang Dani and Prof. Vivek Dighe.

The visit ended with group photos of the participants along with the company representatives.

This industry visit was coordinated by Dr. Praful Sarangdhar with valuable encouragement and guidance from Hon. Director Dr. Shubhangee Ramaswamy.
