Industry Visit to Nutrifresh Farm Tech Pvt. Ltd.

Since 1994

Since 1994

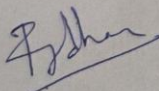

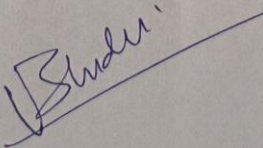

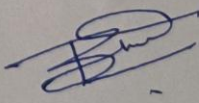

Event Report

Marathwada Mitra Mandal's Institute of Management Education Research and Training (MM's IMERT) organized an Industrial Visit to Nutrifresh Farm Tech Pvt. Ltd. under the guidance of Director, Dr. Shubhangee Ramaswamy. The visit was arranged for MBA students with the objective of providing practical exposure to modern agricultural practices and understanding innovative business models in the agri-tech sector.

During the visit, students were taken on a comprehensive tour of the company's farm, spread across approximately 24 acres. The facility primarily comprised the cultivation of various types of lettuces and cherry tomatoes. Students were introduced to advanced farming techniques, including hydroponic systems and controlled environment agriculture, which ensure efficient resource utilization and high-quality produce. The visit enabled students to observe how technology-driven practices are transforming traditional agriculture into a more sustainable and productive system.

Subsequently, a detailed presentation was conducted in the conference room, where the representatives provided insights into the organization's expansion and operations at another branch of the company. The session highlighted the company's growth journey, operational strategies, and its focus on innovation and quality in agri-business.

The visit concluded with refreshments, followed by the return journey. Overall, the industrial visit was highly informative and offered valuable practical insights into modern farming techniques and agri-business management, thereby enriching students' learning experience beyond the classroom.
